

DAT390 2023H mid-term evaluation

Oppdatert: 29. oktober 2023, 18:18

What feature of the DAT390 course appears to work best?

- The presentations
- Writing a literature review
- Group work and writing the term paper in sections
- Talks about scientific writing

What feature of the DAT390 course makes least sense?

- Group collab
- Not knowing the group assignments at the start of the semester
- Group synergy activity, hard to find something that fits everyone
- presentations

"It makes sense to organize a seminar with about 50 students."

The following concrete change would help improve DAT390:

- It would have been a lot better if we knew the group assignments beforehand like maybe at the start of the semester just like the timeline with individual work instead of a week before. With so many members in a group, it is very difficult to have a group meeting in a weeks time and complete the assignments even though the assignments are not that comprehensive.
- Close the course for students outside of data science, to get ride of the "fake students" that are not actually part of the course
- Adding how to write a standard report, with maybe a workshop.
